Doomsday Engine - Bug #2216

qt locale setting

2017-03-16 12:43 - g_man

Status:	Closed	**Start date:**	2017-03-16
Priority:	Normal	**% Done:**	100%
Assignee:	skyjake		
Category:	Defect		
Target version:	2.0 – Home UI & Packages		

Description

Linux os (manjaro). I have to start doomsday with ENV=LANG C, otherwise I get the same error as in #1021. It seems that my locale (it_IT.UTF-8) is not being overriden by qt, which leads to incorrect decimal point formatting in configuration file.

I'll check that it overrides the locale for number formatting.

The locale that Doomsday attempts to use is "en_US.UTF8". Do you have that one available? (check locale -a) If not, that might be what's causing the issue.
