Doomsday Engine - Bug #2339

Doomsday Shell.app has conflicting version information on macOS

2019-07-28 23:59 - Mimimi12345

Status:	Closed	**Start date:**	2019-07-28
Priority:	Normal	**% Done:**	100%
Assignee:	skyjake		
Category:	Regression		
Target version:	2.1.2		

Description

the Doomsday Shell.app from the Doomsday 2.1.1 release has some problems with the embedded version information:

the CFBundleVersion version entry from the Info.plist file is set to 2.0, while it should be set to 2.1.1
the CFBundleShortVersionString entry is only provided via the localized InfoPlist.strings file instead of the main Info.plist file. Apple has discouraged doing things this way for more than 10 years.

this means the incorrect version number 2.0 will be shown when using 'QuickLook' on the app.

Associated revisions

Revision 7c009e69 - 2019-08-03 18:55 - skyjake

Fixed|macOS: Out-of-date version info in plist

IssueID #2339

History

#1 - 2019-07-29 21:09 - skyjake

- Category set to Regression

- Assignee set to skyjake

- Target version set to 2.1.2

Like #2338, this is probably a problem with the CMake-generated .plist files.

#2 - 2019-08-03 18:55 - skyjake

- Status changed from New to Resolved

- % Done changed from 0 to 100

#3 - 2019-11-30 08:25 - skyjake

- Status changed from Resolved to Closed
