Doomsday Engine - Bug #773

Hexen Not loading Map

2009-09-09 22:25 - ipowers

Status:	Closed	**Start date:**	2009-09-09
Priority:	Normal	**% Done:**	100%
Assignee:			
Category:			
Target version:	1.9.0-beta6		

Description

System:
dell Inspiron 2200 1.5 Ghz 1.24 Gb RAM. Integrated video.

To reproduce just try to play Hexen using Hexen.wad from retail CD.

Keep getting error with WadMapConverter:Convert

Labels: jHexen

Works fine for me. Can you run Doomsday with the highest level of verbose log messaging output and then attach your doomsday.out to this report please.

#2 - 2009-09-17 17:49 - ipowers

I will try it tonight and attach the log to this post.

Thanks for the response and your interest in this issue!

Ok I found it.

#6 - 2009-09-18 23:33 - ipowers

Has anyone been able to figure out why this isn't working? Is there any way that I can resolve it? did I perhaps do something wrong when I set it up?

#7 - 2009-10-20 21:04 - ipowers

I am stupid. I just un-installed and reinstalled the application and everything works very well. Thanks guys for an awesome application.

#8 - 2009-10-20 21:15 - danij

There are countless errors in your log file which indicate that you installed your current version of Doomsday over a much older version, as there numerous files in the log that should not be present. I would suggest you remove all versions of Doomsday an install a fresh copy.

#9 - 2009-10-20 21:17 - danij

Beat me to it. Glad to hear its now working :-)
