

## Doomsday Engine - Bug #1791

### [Hexen] Hub state reset after saving

2014-04-30 20:29 - skyjake

<b>Status:</b> Closed	<b>Start date:</b> 2014-04-30
<b>Priority:</b> Urgent	<b>% Done:</b> 100%
<b>Assignee:</b> danij	
<b>Category:</b> Regression	
<b>Target version:</b> 1.14.2	
<b>Description</b>	
See report in the forums: <a href="http://dengine.net/forums/viewtopic.php?f=7&amp;t=1769&amp;p=11225#p11223">http://dengine.net/forums/viewtopic.php?f=7&amp;t=1769&amp;p=11225#p11223</a>	
Steps to reproduce:	
<ol style="list-style-type: none"><li>1. Warp to 2</li><li>2. Play your way to the Guardian of Ice</li><li>3. Save the game while in Guardian of Ice</li><li>4. Return via the "sword" portal</li></ol>

Fixed|libcommon|GameSession: Replacing internal .save Info

Following File::reinterpret() one must manually (re)populate()

IssueID #1791

##### Revision aac8080f - 2014-05-06 23:54 - danij

Fixed|World|SectorCluster: Crash with sci2.wad (Doom2) upon triggering the exit crusher

The crash was the result of an incorrect assumption that all sector clusters will have at least one outer boundary edge. While this is logically true there are some special cases in which no boundary is recorded (e.g., the one unique outer halfedge is twined with an edge originating from a degenerate BSP leaf). In this case, the trigger is a so-called "control sector" outside the map attempting to update surface light decorations when it's ceiling plane moved.

Todo for later: There is no need for such a cluster to be observing plane movement at all. To address this properly we need two things; 1) BSP building algorithm that guarantees topologically sound and geometrically correct data, 2) more intelligent SectorCluster.

IssueID #1791
