Doomsday Engine - Bug #2055

[MP] Multiple instances can't connect to a local server

2015-05-16 10:46 - vermil

Target version:	Multiplayer			

Description

Multiple instances of Dday running on the same computer can't connect to the same server; Dday immediately disconnects the second player citing a duplicate connection.

In this case, the shell console interestingly incorrectly lists this second players connection time as the time the first player has currently been connected for.

Client identification is determined by the client.id file in the runtime folder. When you were running multiple instances, did they have different userdirs and if so, were the client.id files different, too?

It is safe to delete client.id. A new random one will be automatically generated.
