

## Doomsday Engine - Bug #1097

### [Snowberry] Errors when running from a non-ASCII folder

2012-10-30 09:51 - skyjake

<b>Status:</b> Closed	<b>Start date:</b> 2012-10-30
<b>Priority:</b> Normal	<b>% Done:</b> 0%
<b>Assignee:</b> skyjake	
<b>Category:</b>	
<b>Target version:</b>	
<b>Description</b> When "Doomsday Engine.app" is placed in a folder that has non-ASCII characters somewhere in its path, Snowberry will report errors when starting the frontend. The command line preview does not show the non-ASCII characters correctly. When starting Doomsday, resources are not found (likely affected by <a href="#">[#1088]</a> ).  Tested on OS X Mountain Lion, Doomsday 10.6 build 669.
