Description Why cheat "give *" (give a;give w;give i) is working in Multiplayer game (version 1.7.11)? I think this should be switched off or server can select: allow this cheat or no !!! I think "god" and "noclip" cheats shouldn't be allowed or may be only server may use this cheats. Please make cheat configuration in server settings (before launching server). Thanks! Shouldn't be allowed to cheat at all in multiplayer, well, maybe co-op but that's it. I hate cheaters.
