Doomsday Engine - Feature #1354

KickStart changes.

Description

Kickstart always seems to start under other running
applications.

The PLAY button is not set to trigger when I hit enter
on my keyboard, so I have to move the mouse and click
on it.

Is there any way I can automatically tell KickStart to
Load the first saved file, instead of having to hit F3
and then return.

Cheers.

Jeremy

Wont fix.

Snowberry is the new official Doomsday launcher.
