Category:	
Target version: 1.7.13	
Description It seems that the Ultimate Doom IWAD with identification number 00b948d7 is not being recognized by jDoom. Where does this WAD come from? When you patch registered Doom to Ultimate Doom, the WAD is not 00b948d7. jDoom's version identifier must be fixed so it recognizes IWAD 00b948d7 as well. Labels: jHeretic
