Description	
The Setting up Doomsday for Multiplayer	
http://forums.newdoom.com/showthread.php?t=27578	
is not enough as a dedicated command-line server. The above still launches a GUI full-screen window. This is not feasible for one to run his Doomsday server 24/7 on the master servers list.	
Implementation of a command-line text-based (non-graphical) console dedicated server would be beneficial.

A dedicated text mode server is already implemented. Run Doomsday with the command line option "-dedicated".
