Description

It would be great for deng to be able to save the screenshots as png files as png has good compression and is a lossless format which equals smaller file sizes than tga.
Or jpg if people don't mind a slight loss in quality but an even smaller file size

History

#1 - 2010-06-24 17:53 - skyjake

Screenshots are nowadays saved as PNG images.

- **milestone**: Eventually --> Version 1.9
