

Doomsday Engine - Feature #1527

Warn users about using a wrapper (jdoom.exe etc.)

2011-03-19 11:35 - gobhuo

Status: Rejected	Start date: 2011-03-19
Priority: Normal	% Done: 0%
Assignee:	
Category:	
Target version:	
Description Some users try to use jdoom.exe from old versions (1.8.6 for example) with new 1.9 betas, and then complain that 1.9 is buggy. On Windows, Doomsday should check if it was launched using jdoom.exe/jheretic.exe/jhexen.exe and display a modal warning that this method of launching it is not supported.
