

Doomsday Engine - Feature #1789

@include directive for Info files

2014-04-28 12:40 - skyjake

Status:	Closed	Start date:	2014-04-28
Priority:	Normal	% Done:	100%
Assignee:	skyjake		
Category:	Enhancement		
Target version:	1.15		
Description			
Info and ScriptedInfo files should have a @include directive that allows inserting the contents of another Info file into the currently parsed file.			
The Info parser should keep track of which file each element has been read from.
