

Doomsday Engine - Bug #1792

[OS X] Failed to load example plugin

2014-05-01 08:28 - skyjake

Status:	Closed	Start date:	2014-05-01
Priority:	Low	% Done:	100%
Assignee:	skyjake		
Category:	Defect		
Target version:	1.14.2		
Description			
The example plugin is not prepared for deployment and should not be included in the distribution packages on OS X.			
<pre>Failed to load "/bin/example.bundle/example": [LoadError] (Library::Library) Cannot load library /Applications/Doomsday Engine.app/ Contents/Doomsday.app/Contents/DengPlugins/ example.bundle/example: (dlopen(/ Applications/Doomsday Engine.app/Contents/ Doomsday.app/Contents/DengPlugins/ example.bundle/example, 6): Library not loaded: QtNetwork.framework/Versions/4/ QtNetwork Referenced from: /Applications/Doomsday Engine.app/Contents/Doomsday.app/Contents/ DengPlugins/example.bundle/example Reason: image not found)</pre>
