Description

The application failed to start because it could not find or load the Qt platform plugin "windows"

This message occurs when launching doomsday.exe after installing either.
doomsday_1.15.0_build1294.exe
doomsday_1.15.0_build1295.exe

The problem doesn't occur when reinstalling this versions.
doomsday_1.15.0_build1290.exe

Install Path C:\Program Files (x86)\Doomsday\
Running Windows 7 SP1 (x64)

I tried to manually install VC 2010 Runtimes included in package as well at VC 2010 SP1 runtimes. Problem still occurs.

There will be new builds daily until the issues are resolved.

See the [devblog post](#) for more information:

I fully expect that the next few builds will either not work or will malfunction in other ways.
