

Doomsday Engine - Bug #1999

Window focus/close events ignored during busy mode (should defer)

2015-03-18 15:25 - vermil

Status:	New	Start date:	2015-03-18
Priority:	Normal	% Done:	0%
Assignee:			
Category:	User experience		
Target version:	Input and game controllers		
Description			
Dday currently pauses if the window loses focus during gameplay. However, it doesn't pause if it loses focus during loading (i.e loading a map).

By which I mean, it would be cool if it paused the game immediately upon loading completing, rather than pausing loading, obviously.

#2 - 2015-03-19 10:03 - danij

Similar to quitting while in busy mode, this should be handled by deferring the action (in this case pausing the game) until busy mode ends. Presently if one attempts to quit during busy mode - the request is ignored because we cannot robustly interrupt a busy task to perform the quit immediately. Ideally the users action would be queued (FIFO) and performed later.
