Description

"title" music (external source, ogg format) is played incorrectly (with noise at start) for heretic and hexen

1) Place HEXEN.ogg to data\jhexen\Music
and
mus_titl.ogg to data\jheretic\Music
(should be reproduced with any file, but if you cannot reprocode, I will upload my ones)

2) Run Hexen/Heretic

Actual result: title music is started from noise (see attached mp3 files), special icon is displayed during this noise (see attached icon.jpg) and disappears when noise disappears

Expected result: title music is played correctly, no additional icons are displayed

NOTE: I tried to record a video of this issue with OBS, but issue is not reproducible in this case (it only can be reproduced without OBS recording in parallel)
