Target version: 1.8.6	
Description Currently it is possible to change player class via the console command setclass during a multiplayer game of jHexen. This should not be allowed. Should the net cheats mechanisim be used here? Labels: jHexen Multiplayer

Should the net cheats mechanisim be used here?

Players should be allowed to change their class, but only when they respawn.

A client can't change its player class on its own, though. It must send the server a class change request, which will be granted when the server sees fit.

So, the cheat mechanism probably shouldn't be involved in this.

Perhaps it was an abnormality due to the fact I was using two local players to test with?

Using setclass I could dynamicaly switch between class at any point (I didn't have to wait till I respawned for the change to take effect). With a few alias console commands I found I could swap very quickly during gameplay allowing me access to all the weapons/powers of each class.

For 1.9.8, "setclass" will be applied in a deferred way when the player (re)spawns.
