Target version:			
Description chat doesn't work when pressing "t" to chat. it will let you type but when you press enter it does not get sent. Though brining down the console and typing either "chat" or "say" works, e.g. "chat this message will be visible" "say this will also be visible" I was using in ubuntu 16.04 64bit teamonster was using windows 10 64bit
