If this is still happening after #2215 and #2216, please attach your doomsday.out. Also, is the issue occurring always or is it more random?

#2 - 2017-03-16 22:03 - g_man

Wiping .doomsday and all installed files fixed it, it seems I messed up versions. I assumed it was a bug because before 2259 all was working. My fault.
