

Doomsday Engine - Bug #2216

qt locale setting

2017-03-16 12:43 - g_man

Status:	Closed	Start date:	2017-03-16
Priority:	Normal	% Done:	100%
Assignee:	skyjake		
Category:	Defect		
Target version:	2.0 – Home UI & Packages		
Description			
Linux os (manjaro). I have to start doomsday with ENV=LANG C, otherwise I get the same error as in #1021 . It seems that my locale (it_IT.UTF-8) is not being overridden by qt, which leads to incorrect decimal point formatting in configuration file.

I'll check that it overrides the locale for number formatting.

The locale that Doomsday attempts to use is "en_US.UTF8". Do you have that one available? (check locale -a) If not, that might be what's causing the issue.
