**Description**

Just grabbed latest CVS earlier today and got errors
like this when trying to run Heretic or Hexen:

InitGame: Loading of libjheretic failed
(/usr/games/lib/libjheretic.so: undefined symbol: curpos).

The problem seems to be that the Makefile.am files in
Src/jHeretic and Src/jHexen didn't include st_stuff.c,
so it isn't getting compiled.

Oops, meant to add that changing the Makefile.am files as
described and redoing configure/make/make install indeed
fixed the problem.
