

Doomsday Engine - Bug #300

Mac - screenshots have wrong resolution in .tga header

2006-06-10 19:57 - zachkeene

Status: Closed	Start date: 2006-06-10
Priority: Normal	% Done: 100%
Assignee: danij	
Category:	
Target version: 1.9.0-beta4	
Description Simple endianness issue, it seems. Taking 1280x800 (0x0500 by 0x0320) screenshots of jHeretic on the Mac yielded .tga files with a resolution of 5x8195 (0x0005 by 0x2003). When fixed manually with a hex editor, the screenshot files otherwise seemed fine.
