Target version: 1.9.0-beta4	
Description Longstanding Doomsday Engine bug. If you compare Doom and Heretic, original engines, it is such that on using the Invincibility artifact, the screen colours change. 3 seconds before it wears off, the screen flashes between normal colours and invincibility colours which gives the player time to get behind cover if attacking. Now JDOOM supports this and it works JHERETIC does not. Yet it ws in the original Heretic (1.0, 1.1, 1.2, 1.3) Stephen Howe Labels: jHeretic

Thanks for the patch zachkeene.

Fixed in SVN for 1.9.0-beta5.
