

Doomsday Engine - Bug #728

[1.9.0 beta6.4] Loading definitions via command line broken

2009-07-08 20:13 - deus-ex

Status: Closed	Start date: 2009-07-08
Priority: Normal	% Done: 100%

Target version: 1.9.0-beta6	

Description

Loading of definitions via command line argument doesn't work in the current release (Note that I don't use Snowberry/Kickstart). Either I have to place my custom definitions in the folder \Defs\jDoom\Auto\ or use a addon-package recreating this folder structure to have my custom definitions loaded.

Kind regards,
deus-ex

Definition loaded via the command line options -def and -defs seems to work just fine for me under Windows.

I'll step through the load process manually and see if I come across anything that might cause it to fail on other platforms.

#2 - 2009-07-24 13:37 - skyjake

I'm interested to know if the -def option works for deus-ex if the full absolute path of the definition is used on the command line.

#3 - 2009-07-24 13:52 - danij

I've found and fixed one issue I noticed; The abbreviated command line option -d (the short form of -defs) for loading DED files was not working. Perhaps that is the problem deus-ex is having.

#4 - 2009-07-24 13:58 - deus-ex

The abbreviated command line option -d (the short form of -defs) for loading DED files was not working. Perhaps that is the problem deus-ex is having.

Yes, confirmed! I just found out myself after trying to answer SkyJake's "-defs with full path" question. So that makes one more bug squashed. :)

Kind regards,
deus-ex

#5 - 2009-07-24 14:04 - danij

Thanks for confirmation deus-ex.

Fixed in svn for 1.9.0-beta6.5
