

Doomsday Engine - Bug #747

warnings require fixes

2009-08-11 21:37 - sergepavlovsky

Status: Closed	Start date: 2009-08-11
Priority: Normal	% Done: 100%

Target version:	
Description its good idea to have code compiled without warnings some of them are definitely bugs like doomsday/engine/portable/src/def_read.c:2425: warning: 'result' may be used uninitialized in this function doomsday/engine/portable/src/dam_file.c:390: warning: array subscript is above array bounds doomsday/engine/portable/src/m_misc.c:1133: warning: call to <i>builtin_strncat_chk</i> might overflow destination buffer doomsday/engine/portable/src/m_misc.c:1145: warning: call to <i>builtin_strncat_chk</i> might overflow destination buffer doomsday/engine/portable/src/r_extres.c:174: warning: call to <i>builtin_strncat_chk</i> might overflow destination buffer doomsday/engine/portable/src/net_demo.c:150 warning: call to <i>builtin_strncat_chk</i> might overflow destination buffer doomsday/plugins/common/src/m_ctrl.c:405: warning: cast from pointer to integer of different size doomsday/plugins/common/src/hu_stuff.c:896,898,921,923: warning: array subscript has type 'char' doomsday/plugins/common/src/hu_menu.c:3090,2653: warning: array subscript is above array bounds many size mismatches probably are reason for instant crash of 64bit build i've attached full build log
