Works fine for me. Can you run Doomsday with the highest level of verbose log messaging output and then attach your doomsday.out to this report please.

#2 - 2009-09-17 17:49 - ipowers

I will try it tonight and attach the log to this post.

Thanks for the response and your interest in this issue!

Ok I found it.

#6 - 2009-09-18 23:33 - ipowers

Has anyone been able to figure out why this isn't working? Is there any way that I can resolve it? did I perhaps do something wrong when I set it up?

#7 - 2009-10-20 21:04 - ipowers

I am stupid. I just un-installed and reinstalled the application and everything works very well. Thanks guys for an awesome application.

#8 - 2009-10-20 21:15 - danij

There are countless errors in your log file which indicate that you installed your current version of Doomsday over a much older version, as there numerous files in the log that should not be present. I would suggest you remove all versions of Doomsday an install a fresh copy.

#9 - 2009-10-20 21:17 - danij

Beat me to it. Glad to hear its now working :-)
