Doomsday Engine - Bug #892

[Win] sys_input.c includes MSVC header

2010-04-11 23:53 - arclore

Status:	Closed	**Start date:**	2010-04-11
Priority:	Normal	**% Done:**	100%
Assignee:	danij		
Category:			
Target version:	1.9.0-beta6		

Description

engine/win32/sys_input.c (Windows DirectInput) includes the header "strsafe.h" which is MSVC-specific. To compile deng with MinGW, it needs to be wrapped with:
#ifdef _MSC_VER
#include <strsafe.h>
#endif

Labels: Controllers

History

#1 - 2013-07-15 16:47 - danij

Removed the include entirely as this file no longer makes use of it.

Fixed for 1.9.0-Beta6.10
